Manual Cascading Deletes

[These delete functions are Informix stored
procedures which are invoked by the WHFS
HydroBase application.]

[deletes from many tables
in appropriate order]

delete_location

.1

[This is NOT a data flow.
It is a control flow, i.e.,
delete_location calls
delete_riverstat.]

delete_radar

.3

[deletes from many tables
in appropriate order]

**execute_
delete_
riverstat**

delete_riverstat

.2

[This is NOT a data flow.
It is a control flow, i.e.,
delete_location calls
delete_resvr.]

[deletes from many tables
in appropriate order]

**execute_
delete_
resvr**

Reservoir ⟵⟶ **delete_resvr** ⟵⟶ **Rescap**
